

**Duration:** 01.01.2019 - 31.05.2019

**Supported by:** Bremen University of Applied Sciences

**Goal of the project:** The cluster-project of the Bremen University of Applied Sciences explores the use of virtual reality as a tool for creative design in urban spaces.

Participative workshops will be held in which participants will have the opportunity to visualize their ideas for urban and spatial development immersively with the help of VR tools.

**Partner:** Bremen University of Applied Sciences

**HSB**
